

This method works for ALL Hiland Propane Heaters, tall and tabletop.

How to properly start a propane heater

STEP 1
CONNECTION

Make sure your hose is connected and the propane tank is turned on.

For questions, please contact Tech Support at 888-775-1330

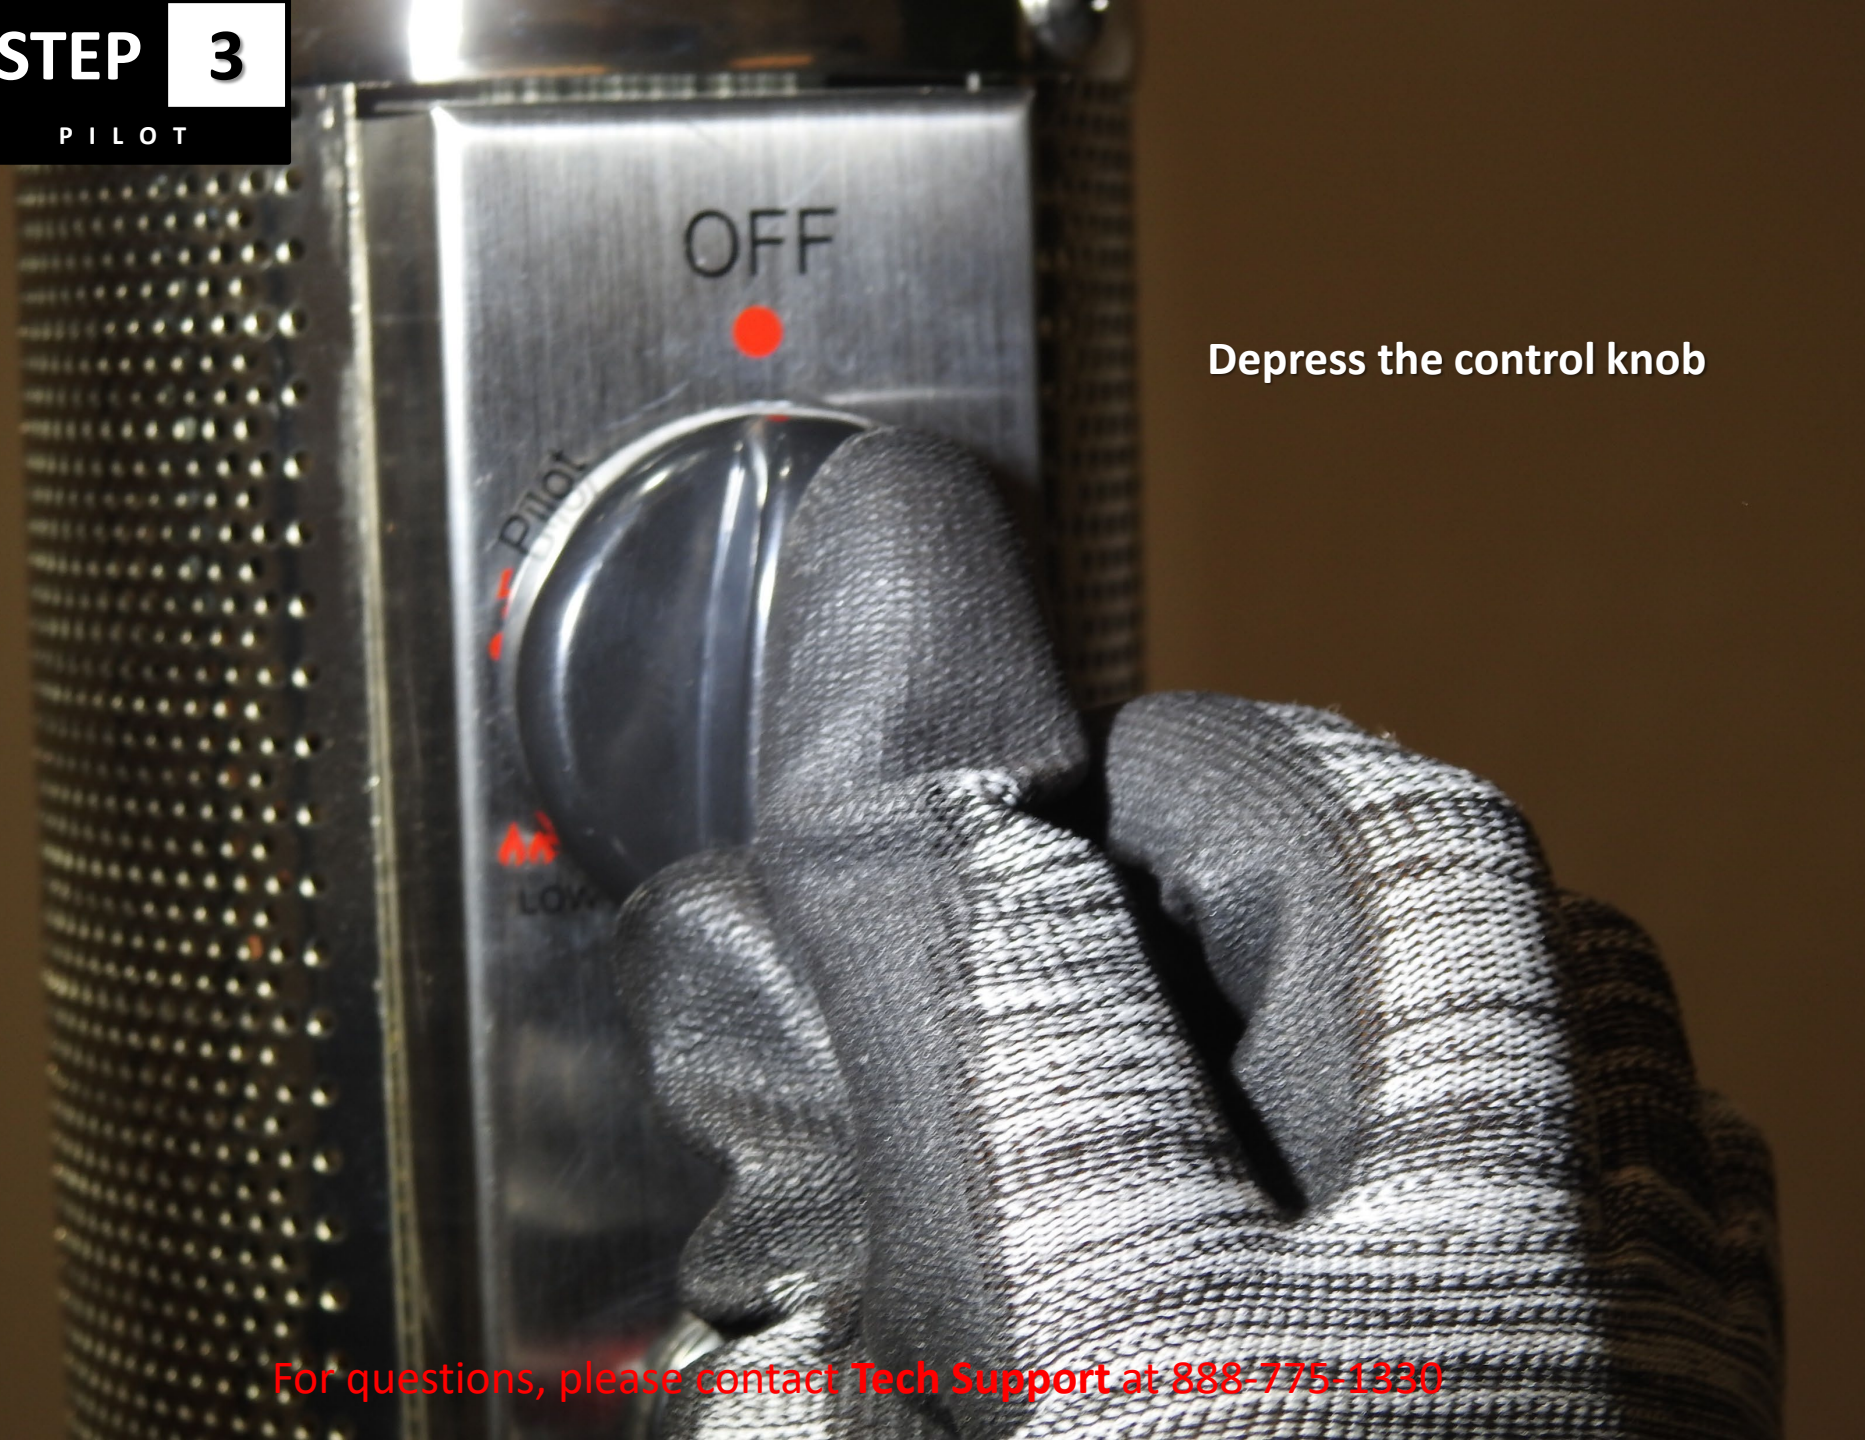

STEP 2
PILOT

Locate the control knob on your unit

For questions, please contact Tech Support at 888-775-1330

STEP 3
PILOT

Depress the control knob

For questions, please contact **Tech Support** at **888-775-1330**

STEP 3
PILOT

Turn counter-clockwise until
the knob stops

If your unit does not have a pilot and is
direct, skip to step 5

CORRECT →

For questions, please contact Tech Support at 888-775-1330

WRONG

OFF

DO NOT stop at the word pilot; stop at 9 o'clock.

WRONG

Pilot

For questions, please contact Tech Support at 888-775-1330

STEP 4

PURGE

OFF

Pilot

LOW

Hold the knob in and allow
to purge 45-60 seconds.

For questions, please contact Tech Support at 888-775-1330

STEP 5
IGNITE
PILOT

**Piezo Ignitor:
Hit ten times while holding
the knob in**
